

High-performance first line assurance

Ultimate confidence in half the time

Your first line assurance sorted twice as fast

We've revolutionised first line assurance. By pairing revolutionary tech with 20 years of file review experience, we've cut review times in half.

How do we do it? Our high-performance solution combines digital pre-checks with human reviews, all wrapped up with technology that accelerates the process. As a result, we've eradicated the manual barriers that can make first line assurance slow and inefficient.

Not only will you satisfy the regulators, but you can be sure you're giving your customers the best possible outcomes. And there's nothing healthier for your commercial success than happy customers.

It doesn't get any better than this

What we do

By fully outsourcing to us, you'll remove the pressure of recruitment and capacity planning. Delivered from one of our UK sites, we have a tried and tested infrastructure and an experienced team ready to go. We'll give you:

Lightning-fast turnaround

We've supercharged our file review process with custom-built technology to cut out the manual barriers and conduct file reviews in half the time. Increase your review population or reduce your costs – either way, you get more power over your budget.

Superior quality

Our human checks are of unquestionable quality. They're based on years of industry and regulatory exposure, a superior review methodology, highly skilled people and technology that improves your audit trail.

True risk-based reviews

We run our tech over all your files to digitally detect risk and push them into the review population for a human check. We'll focus your review on the files which pose the highest risks, concentrating skilled resource where it's needed most.

How you benefit

More cost-effective

Get more power over your budget. Our solution enables you to cut your costs or increase your review populations.

Reduce risk

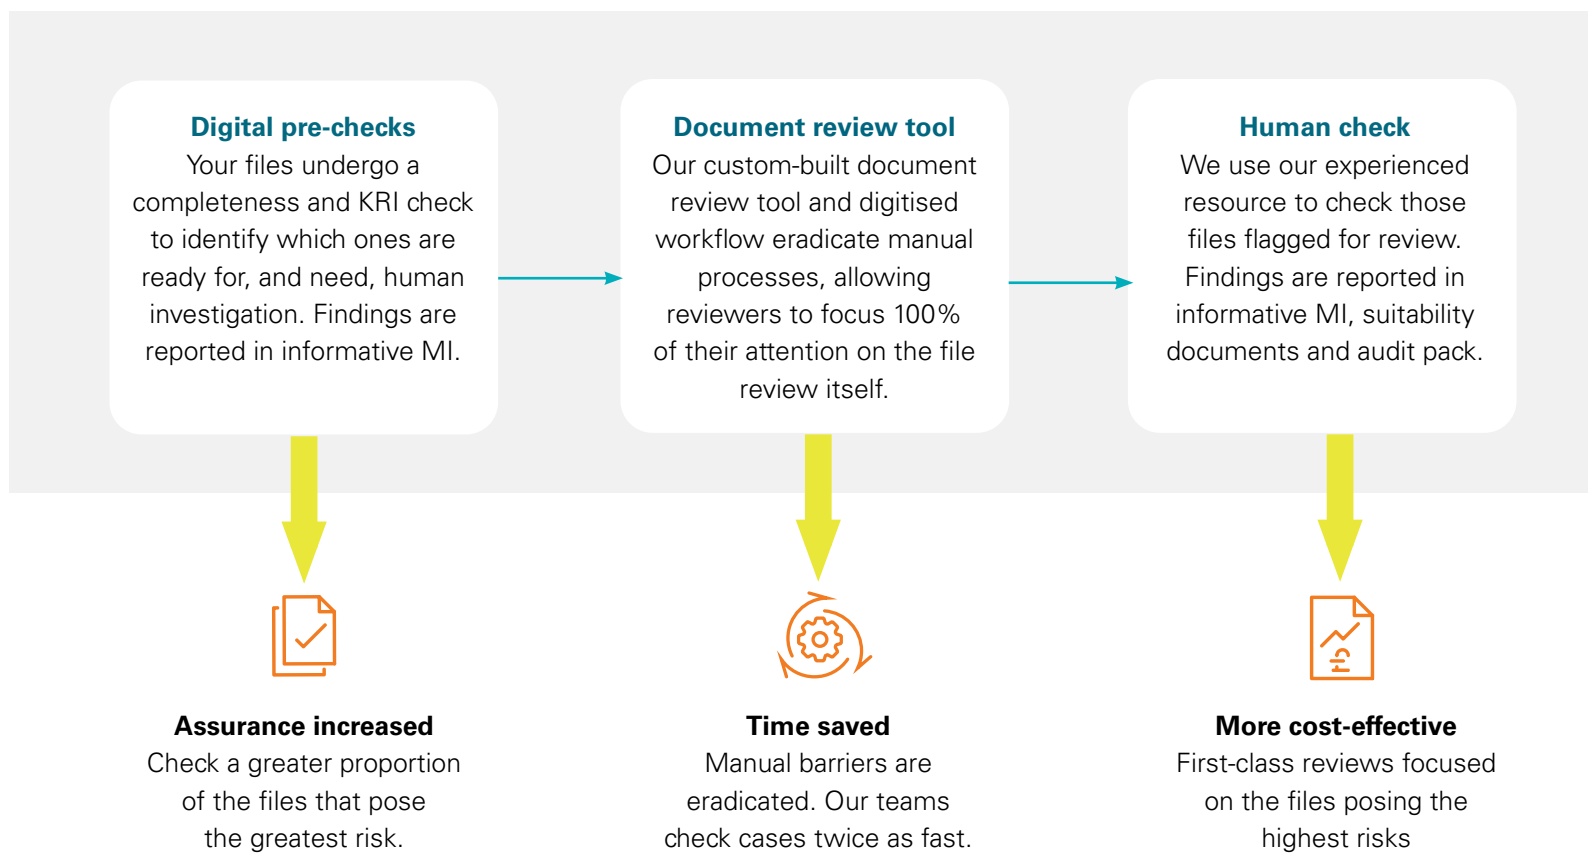

Get more control over risk management by increasing your spans of control.

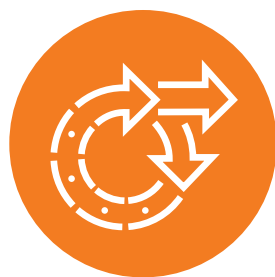

Confidence in assurance

Relieve the headache of managing first line assurance risk by outsourcing to an experienced provider.

Our technology is cutting-edge...

...and so are our people

Optimised process

We've been doing this for 20 years and have completely optimised the process to eliminate any inefficiencies.

Experienced resource

Our people are highly trained, expert reviewers. They've seen it all, and they know exactly what to look for.

Quality methodology

Our methodology is tried and tested. You can't get a more comprehensive review.
