

Your licence to kill it

Setting you up for success with FCA authorisations & VoP

We'll help you get your licence to operate, whether it's FCA authorisation or variation of permissions, and set you up for future success.

We don't just fill in forms - that's the easy part. We make sure your underlying compliance frameworks and the documentation to evidence it will live up to FCA standards. Most importantly, we'll make sure your business plan sets out how you will manage conduct risk and is synonymous with the FCA's agenda for protecting customers, market integrity and competition, alongside providing commercial reward.

Getting it right from the start means you'll have secure and compliant foundations to go out there and kill it!

Connecting the dots

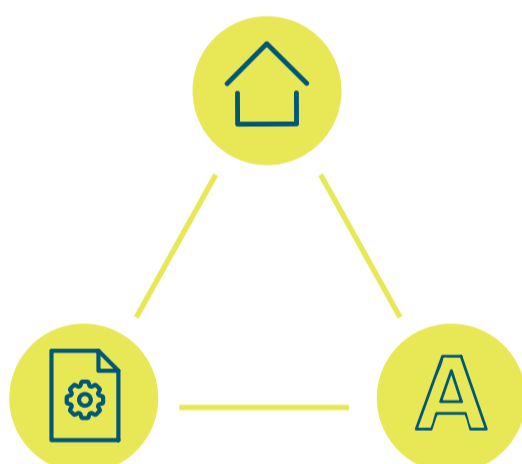

We connect the dots between culture, compliance and commercial success which means you'll manage risk while reaching your strategic goals.

What we do

Our solutions are tailored and range from simple guidance throughout your journey to full completion of the application process.

Demonstrate that your strategy is compatible with your regulated activities and is synonymous with the FCA's focus on protecting customers, market integrity and competition.

Develop and improve understanding of the FCA's expectations for supporting documentation.

Build a clear and coherent business plan/model that articulates your proposition.

The application journey

Download application form, review requirements and draft a project plan

Share plan with stakeholders and gain feedback

Conduct gap analysis to identify areas of concern and action

Update plan, progress actions and submit to the FCA

Following application submission, queries and changes, you'll receive authorisation

How we do it better

Specialism

We've supported FSA/FCA authorisation for nearly 20 years. It's one of our most popular services.

Commercially minded

We know where you should be concentrating your effort, saving you time and money.

Enduring transformation

Our approach improves your frameworks for effective risk management that endures beyond authorisation.
